

Digital products, built to work.

Koraq Labs is a Nigerian technology studio designing and building websites, landing pages, and web applications for businesses ready to look credible, reach more customers, and operate better online.

[WEBSITES](#)[LANDING PAGES](#)[WEB APPLICATIONS](#)[DIGITAL PRODUCTS](#)koraqlabs@gmail.com[WhatsApp 0814 383 2354](https://wa.me/08143832354)

Technology that solves business problems.

Koraq Labs is a Nigerian technology studio focused on building practical digital products for businesses.

We believe technology should solve business problems, not simply look impressive. From a high-converting landing page to a complete business platform, we combine strategy, design, and software development to create digital experiences that businesses can actually use and grow with.

MISSION

To give Nigerian businesses digital products that are genuinely useful — built with the same standard of craft as the software they use every day.

VISION

To become a long-term technology partner for businesses across Nigeria, growing with them from their first website to the systems that run their operations.

CORE VALUES

Simplicity

The simplest solution that solves the problem is the right one.

Reliability

Things we build should work, keep working, and be easy to maintain.

Practical Innovation

New technology is worth using when it makes a real difference.

Business Impact

Design and code are judged by what they do for the business.

Continuous Improvement

Every project should be better made than the one before it.

AT A GLANCE

BASED IN

Nigeria

WE BUILD
KORAQ LABS — COMPANY PROFILE

Websites, landing pages, web applications

WE SERVE

SMEs, startups, professionals, organizations

Four ways we help businesses show up and operate online.

A

Business Websites

Professional websites designed to establish credibility, communicate value, and convert visitors into customers. Structured around how your customers actually search for, evaluate, and contact you.

B

Landing Pages

Focused pages for products, campaigns, services, launches, and lead generation. No competing navigation — one clear path from headline to enquiry.

C

Web Applications

Custom platforms, dashboards, portals, internal tools, and business systems. Applications with real data, real users, and real business logic behind them.

D

Website Redesign & Optimization

Modernize outdated websites — improving user experience, responsiveness, performance, and conversion, while preserving the content and search value already built.

ALSO INCLUDED WHEN A PROJECT NEEDS IT

Hosting & Deployment

Domain & SSL Configuration

Website Maintenance

API Integrations

Custom Business Automation

Not just a website. A digital asset for your business.

01

Business First

Every project starts with understanding the business, customers, and desired outcome.

02

Built for Mobile

Designed around how Nigerian customers actually access the internet.

03

Fast & Modern

Modern technologies, responsive interfaces, performance-focused development.

04

Built to Grow

Start with a website and evolve into a full digital product when your business needs it.

YOUR FIRST WEBSITE DOESN'T HAVE TO BE YOUR FINAL DIGITAL PRODUCT

START

AUTOMATE

Digital System

A process that keeps projects moving.

Every project runs through the same four stages, with a fifth available for businesses that want us to stay involved after launch.

01	Discover	Understand your business, customers, goals, and requirements. We ask the questions that determine what actually needs building.
02	Design	Create the structure, visual direction, and user experience — agreed before any development begins.
03	Build	Develop the website or digital product using modern technologies, with progress you can see as it happens.
04	Launch	Deploy, configure the domain, optimize the experience, and hand over the project with everything documented.
05	Support	OPTIONAL Optional. Maintenance, updates, improvements, and technical support on an ongoing basis.

WHAT YOU CAN EXPECT THROUGHOUT

A named point of contact, progress you can see rather than wait for, and no surprise costs — anything outside the agreed scope gets discussed and quoted before it's built.

We build for businesses, not industries.

The structure changes, the standard doesn't. What matters is how your customers find you, what convinces them, and how they get in touch — that thinking applies anywhere.

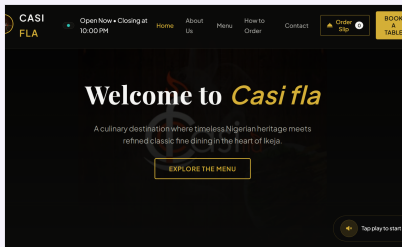

Healthcare	Real Estate	Hospitality
Retail	Automotive	Professional Services
Education	Startups	Financial Services
Logistics		

A NOTE ON EXPERIENCE

We don't claim specialised expertise in an industry unless our portfolio supports it. Where we've shipped work in a sector, we'll show you. Where we haven't, we'll tell you that too — and explain how we'd approach it.

SELECTED WORK

Projects we've shipped.

● LIVE PROJECT

Casifla

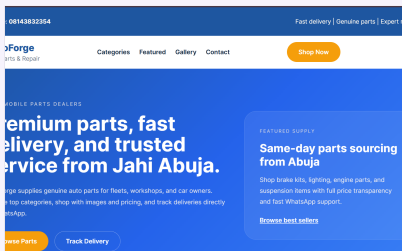

HOSPITALITY — RESTAURANT WEBSITE

A refined fine-dining website experience designed to showcase the restaurant, guide guests through its menu, and encourage reservations.

HTML

CSS

JavaScript

● LIVE PROJECT

Autoforge

AUTOMOTIVE — AUTOMOTIVE WEBSITE

A focused auto-parts and repair website that helps dealers, fleets, and drivers explore parts, discover services, and place enquiries through WhatsApp.

Next.js

TypeScript

Tailwind CSS

DEMO CONCEPTS

Self-initiated concepts exploring how different industries might structure their websites. These are not client projects.

DEMO CONCEPT

Healthcare Practice

Business Website

DEMO CONCEPT

Restaurant Launch Page

Landing Page

DEMO CONCEPT

Real Estate Agency

Business Website

Modern technology. Practical results.

We choose tools based on what a project actually needs — not to put logos on a page. A landing page doesn't need a database. A booking system does. The right answer is the one that keeps the project fast to build and simple to maintain. Not every project uses every technology listed here.

WHAT WE HANDLE END TO END

- Discovery & scoping
- Web application development
- Deployment pipelines
- Interface design
- API integrations
- Performance tuning
- Front-end engineering
- Domain & SSL configuration
- Ongoing maintenance

HOW WE MAKE TECHNOLOGY DECISIONS

Fit before fashion

The stack follows the requirement, never the other way round.

Boring where it counts

Proven tools for the parts that must not break.

Owned, not locked in

You get the code and the accounts. Nothing is held hostage.

Clear starting points, scoped to what you need.

LANDING PAGE

Starter

From ~~₦~~250,000

- One-page website
- Mobile responsive
- WhatsApp CTA
- Contact form
- Basic SEO
- Domain connection
- Deployment

BUSINESS WEBSITE

Business

From ~~₦~~750,000

- 4-7 pages
- Responsive design
- Contact forms
- WhatsApp integration
- Google Maps
- Basic SEO
- Analytics
- Domain connection
- Deployment

WEB APPLICATION

Custom

Custom pricing

- Custom functionality
- Database integration
- API integrations
- Authentication
- Advanced forms
- Admin functionality
- Custom deployment

Every project is quoted after we understand the scope. These are starting points, not fixed prices — the conversation matters more than the package.

The questions we get most.

How long does a website take?

Most standard business websites are completed within 1-2 weeks, depending on scope and how quickly content is available.

Do you build websites for new businesses?

Yes. We can help structure the website even if your business is just getting started.

Can you redesign an existing website?

Yes. We audit what you have, keep what works, and rebuild the rest.

Do you provide domain and hosting setup?

Yes. Domain, DNS, SSL, hosting, and deployment can all be handled as part of the project.

Will my website work on mobile?

Yes. Everything is designed mobile-first, because that's how most Nigerian customers will reach you.

Can you maintain the website after launch?

Yes. Maintenance, updates, and technical support are available as an ongoing service.

Can you integrate WhatsApp?

Yes. WhatsApp enquiry buttons and pre-filled message links are standard on most sites we build.

Can you build web applications?

Yes. Dashboards, portals, booking systems, and internal tools are all within scope.

How much does a website cost?

Landing pages start from ₦250,000 and business websites from ₦750,000. Applications are quoted per project.

How do I start a project?

Send your details through the enquiry form or message us on WhatsApp. We'll come back with next steps.

START A PROJECT

Let's build something that works.

Tell us what you're trying to build. We'll help you determine the right digital solution — whether that's a single landing page or a system that runs part of your business.
